## INSTALLATION

### PRECAUTIONS

- Choose the mounting location carefully so that the unit will not interfere with the normal driving functions of the driver.
- Avoid installing the unit where it would be subject to high temperatures, such as from direct sunlight or hot air from the heater, or where it would be subject to dust, dirt or excessive vibration.
- Use only the supplied mounting hardware for a safe and secure installation.
- Be sure to remove the front panel before installing the unit.

**Mounting angle adjustment**  
Adjust the mounting angle to less than 20°.

### MOUNTING EXAMPLE

Installation in the dashboard

**Note:** Keep the release key in the safe place as you may need it in future to remove the unit from the car.

### Detaching and attaching the front panel

The front panel of this unit can be detached in order to prevent the unit from being stolen.

### DETACHING THE FRONT PANEL

Before detaching the front panel, be sure to press the PWR button OFF first. Pull out the panel towards you in order to detach completely the panel from the main unit. Refer to instruction.

### ATTACHING THE FRONT PANEL

Make sure the front panel is the right way up when attaching it to the unit as it cannot be attached upside down. Bring side B of panel to side A of main unit. Insert the panel in and push until it clicks. Panel is attached.

### Notes:

Do not press the front panel hard against the unit when attaching it. It can be easily attached by pressing it lightly against the unit.

When you carry the front panel with you, put it in the supplied front panel case. Do not press hard or give excessive pressure to the display window of the front panel when attaching it to the unit.
